

I respectfully ask you to reject the NAB's petition 04-160, and support XM's ability to provide Traffic, Weather, and all other forms of programming. I listen to XM at work, where I can not get tuned into regular radio stations. Being able to listen to XM is a huge benefit, espically the traffic, I live in the DC Metro Area, and being able to listen to the traffic report on my way out of work is very helpfull.
